

October 16, 2025: On Extortion Reins

I am not the only person being stalked around San Antonio, Texas.

Our own police chief was being stalked in very serious and intrusive ways.

KSAT confirmed Vittitoe was officially booked into the Bexar County Adult Detention Center on Wednesday.

Bexar County court records show Vittitoe's two stalking charges are considered third-degree felonies.

In an arrest affidavit obtained by KSAT, an SAPD officer wrote that Vittitoe "engaged in repeated, unwanted electronic communications" with SAPD Chief William McManus and his wife. According to the affidavit, Vittitoe contacted the couple with at least two dozen (24) voice and text messages between Sept. 3 and Sept. 5.

In some of those messages, court documents show, Vittitoe expressed "anger and dissatisfaction" to McManus regarding the outcome of one of his unrelated criminal cases.

According to Vittitoe's arrest warrant, he also sent two of the following intrusive messages to the police chief.

I am presenting to the public at large that these incidents could be related.

What seems like an isolated 'grievance' by one man about one item of concern could very well be indicative of a much larger plot to cause direct threats to politicians and police representatives in our area.

"How's the female McManus...Had her on LinkedIn then account got deleted...we followed each other," Vittitoe said in the first message.

"Well, I gave you your 15-day Notice," Vittitoe said in the second message. "A few more days left. Hope you make the right decision."

While McManus has not responded to any of the messages and has never met Vittitoe, the suspect found McManus' registered phone number and also sent photos near the couple's home to McManus' wife.

We have already seen that federal judges are being threatened, politicians are being threatened, and here is evidence of the chief of police for a major city being threatened!

Is it *really so far fetched to believe* that a local attorney that did the work that I did in my legal career is being threatened by the same campaign that fed him the energy and encouragement to continue filing important legal matters? It's not.

We are all facing serious threats from the mind of Donald Trump. I am submitting to you all, publicly, that the 'lone wolf' is likely just one head of a much larger problem - organized terrorism against people that are of concern to the illegal and unlawful agents of the USA military.

Texas Rangers, I have already alerted you to the facts: Donald Trump is using extortion and terror against our home in an attempt to curtail and control my political speech! I am submitting to you that there are likely many other victims - victims holding important positions of public safety, security, and accountability - that cannot come forward to make their cases known to you for reasons that are *very personal to their specific cases*.

This are called 'EXTORTION REINS' and are a very serious reason for the corruption that destroys a country.

Sexual violence, torture and betrayal: Life under Putin's occupation

Evidence gathered by The Telegraph reveals Russia is using rape as a weapon of war in occupied Ukraine

(For the official record - a slow heavy duty truck is now 'driving the message' that I too will be raped in prison.)(This is what I have received for my work to investigate the voting results of Texas)(God, bless Yeah yea.. whatever)(FACT: Sadistic Personality Disorder is being expressed through the national security apparatus of the United States of America.)

Denis described being forced to watch while a fellow captive was raped by the guards.

Denis consultative conclusion of a specialist (psychiatrist): Post-traumatic stress disorder, depressive syndrome Credit: Ximena Borrazás

"They took me to a garage and forced me to watch as a man had his head and legs held down while he was raped," he said.

Like something out of a dystopian satire, if Denis closed his eyes or tried to avert his gaze, they would beat him severely or administer electric shocks to his feet.

"If you don't watch, this could happen to you," a guard told him.

Denis too was sexually assaulted while in captivity. He is one of hundreds of Ukrainians to come forward and report sexual abuse by Russia's occupying forces since the start of the war.

From Kyiv to Kherson, The Telegraph travelled across Ukraine gathering evidence on atrocities committed by Russian troops from those who lived under Russian occupation.
